

Lance Wilson

I can do everything I want.

When he was only 45, Lance made the decision to have hip resurfacing surgery at the Kennedy Center. Lance explains, "I knew it was time to get help when my hip gave out, and I almost dropped my baby."

Lance's hips were so painful that he couldn't straddle his four-wheeler or ride a horse. Now after hip resurfacing surgery, Lance is back at work with the Outagamie County Sheriff's department and doing all the activities he loves.

"Thanks to Dr. McLaughlin, I have almost no pain in my hips, and I can do everything I want."
